

The best way to Peel off the Weight

Derived from bitter orange, Advantra Z[®] generates heat in the body by increasing the metabolic rate to help burn calories and fat. This process known as thermogenesis is the only proven method of weight loss supported by several double-blind, placebo-controlled studies using products containing Advantra Z[®].

Recognized as a breakthrough innovation, Advantra Z[®] is the only thermogenic ingredient that is patented in the US (6,224,873; 6,316,499; 6,340,481; 6,340,482) and Canada (2,248,854) with other patents pending internationally. Its effectiveness stems from special harvesting techniques and a proprietary extraction method that yield a synergistic composition of potent amines.

Along with proper diet and exercise, there is no better ingredient to help your customers improve their athletic performance and their waist lines.

Potent thermogenic amine composition

Synephrine
N-methyltyramine
Hordenine
Octopamine
Tyramine
